JOB OFFER:

Senior or Junior Embedded Software Developer (m/f)

ROC Connect offers Smart Home as a Service and has a complete range of managed service solutions in this field. Our team has extensive experience in the design and development of embedded software used in „Smart Home Applications" meeting the highest quality standards. We are working with some of the world's largest telecommunications companies, utilities, device manufacturers and retailers in the EMEA, North and South America and Australasia.

Job description:

In this technically challenging function, you will be responsible for integrating various device types into the ROC-Connect smart home system.

Responsibilities:

- Develop and maintain "OpenWrt" - buildsystems.
- Integrate various IP devices (REST or plain Binary) in our ERLANG-System
- Integration of radio stacks like ZigBee, Z-Wave, WiFi, Bluetooth, ULE-Dect, etc.

Skill Profile:

- Experience in embedded software development, preferably in the Smart Home sector
- Very good knowledge of programming in „C" and „ERLANG"
- Basic IT Knowledge of HTTP, REST, TCP/IP
- Good technical understanding, analytical thinking
- Independent and precise way of working
- Good command of English

We offer:

The above-described position will be on a full time basis, salary negotiable.
The job base is located in Mödling (NÖ, Austria), but you will be part of our international and interdisciplinary team.
We are an Equal Opportunity Employer and do not discriminate against applicants due to race, ethnicity, gender, disability or others.
If you are interested in working in a dedicated team, we look forward to receiving your application.
